Mr. Steve Vicenzi  
Director of Management Services/CFO  
City of Kalamazoo  
241 W. South Street  
Kalamazoo, Michigan 49007

**Re: City of Kalamazoo Postretirement Welfare Benefits Plan Actuarial Valuation as of  
January 1, 2025 Actuarial Disclosures**

Dear Mr. Vicenzi:

The results of the January 1, 2025 Actuarial Valuation of the City of Kalamazoo Postretirement Welfare Benefits Plan are presented in this report.

This report was prepared at the request of the City of Kalamazoo and is intended for use by the City of Kalamazoo and those designated or approved by the City. This report may be provided to parties other than the Plan sponsor only in its entirety, and only with the permission of the plan sponsor. GRS is not responsible for unauthorized use of this report.

The purposes of the valuation are to measure the Plan's funding progress, and to determine the employer contribution for the fiscal year ending December 31, 2025. This report should not be relied on for any purpose other than the purposes described herein. Determinations of financial results associated with the benefits described in this report, for purposes other than those identified above, may be significantly different. This report does not include actuarial information needed to satisfy reporting requirements under Governmental Accounting Standards Board Statements No. 74 or No. 75.

This valuation assumed the continuing ability of the plan sponsor to make the contributions necessary to fund this Plan. A determination regarding whether or not the plan sponsor is actually able to do so is outside our scope of expertise and was not performed.

Results presented in this report are developed using the actuarial assumptions and methods disclosed in this report. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. This report does not include a robust assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment. We encourage a review and assessment of the investment and other significant risks that may have a material effect on the Plan's financial condition.

The findings in this report are based on information furnished by the City concerning retiree health care benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal reasonability and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by the City.

This report was prepared using assumptions adopted by the City. All actuarial assumptions used in this report are reasonable for the purposes of this valuation. All actuarial assumptions and methods used in the valuation follow the guidance in the applicable Actuarial Standards of Practice. Additional information about the actuarial assumptions is included in the section of this report entitled Actuarial Cost Method and Actuarial Assumptions.

This report was prepared using our proprietary valuation model and related software which, in our professional judgment, have the capability to provide results that are consistent with the purposes of the valuation and have no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

This report has been prepared by actuaries who have substantial experience valuing public retiree health programs. To the best of our knowledge, the information contained in this report is accurate and fairly presents the actuarial position of the City of Kalamazoo Postretirement Welfare Benefits Plan as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, and with the Actuarial Standards of Practice issued by the Actuarial Standards Board.

James D. Anderson and Michael D. Kosciuk are Members of the American Academy of Actuaries (MAAA). These actuaries meet the Academy's Qualification Standards to render the actuarial opinions contained herein. The signing actuaries are independent of the plan sponsor, and all actuarial assumptions used in this report are reasonable for the purposes of this valuation.

Gabriel, Roeder, Smith & Company will be pleased to answer any questions pertaining to the valuation.

Respectfully submitted,  
Gabriel, Roeder, Smith & Company

James D. Anderson, FSA, EA, FCA, MAAA

Michael D. Kosciuk, FSA, EA, FCA, MAAA

JDA/MDK:ah

## EXECUTIVE SUMMARY

---

# Executive Summary

## Actuarially Determined Contribution

For fiscal years beginning after June 15, 2016, GASB Statement No. 74 replaced GASB Statement No. 43. Similarly, for fiscal years beginning after June 15, 2017, GASB Statement No. 75 replaced GASB Statement No. 45. It is our understanding that the Plan is required to comply with both GASB Statement Nos. 74 and 75, and as such required a separate GASB Statement Nos. 74 and 75 report at the completion of each fiscal year.

We have calculated the Actuarially Determined Contribution for the calendar year beginning January 1, 2025 under an interest rate assumption of 7.25%. Below is a summary of the results. The Actuarially Determined Contributions and estimated retiree claims and premiums shown below are net of any premium payments expected to be made by retirees (retiree cost sharing).

	<b>Actuarially Determined Contribution</b>	<b>Estimated Claims and Premiums Paid for Retirees</b>
2025 Calendar Year	\$ 178,385	\$ 8,324,818

For additional details please see the section titled "Valuation Results."

## Liabilities and Assets

1. Present Value of Future Benefit Payments	\$118,673,984
2. Actuarial Accrued Liability	115,287,201
3. Smoothed Plan Assets	121,567,514
4. Unfunded Actuarial Accrued Liability (2) – (3)	(6,280,313)
5. Funded Ratio (3)/(2)*	105.4%

\* The funded ratio on a market value basis is 107.0%.

The Present Value of Future Benefit Payments (PVFB) is the present value of all benefits projected to be paid from the Plan for past and future service. The Actuarial Accrued Liability is the portion of the PVFB allocated to past service by the Plan's funding method (see the section titled "Actuarial Cost Method and Actuarial Assumptions").

**SECTION A**

---

**VALUATION RESULTS**

## Valuation Results – Total Plan

### Development of the Actuarially Determined Contribution

Contributions for	2025 Calendar Year
Employer Normal Cost	\$690,194
Administrative Expense Allowance	120,000
Amortization of Unfunded Actuarial Accrued Liability	<u>(631,809)</u>
Actuarially Determined Contribution	\$178,385

The unfunded actuarial accrued liabilities were amortized as a level dollar amount over a period of 17 years for the 2025 calendar year.

### Determination of Unfunded Actuarial Accrued Liabilities as of January 1, 2025

A. Present Value of Future Benefits	
i) Retirees and Beneficiaries*	\$ 87,827,157
ii) DROP Members	4,131,575
iii) Vested Terminated Members	0
iv) Active Members	<u>26,715,252</u>
Total Present Value of Future Benefits	\$118,673,984
B. Present Value of Future Normal Costs	3,386,783
C. Actuarial Accrued Liability (A.-B.)	115,287,201
D. Actuarial Value of Assets	121,567,514
E. Unfunded Actuarial Accrued Liability (C.-D.)	(6,280,313)
F. Funded Ratio (D./C.)	105.4%

*\* Includes additional liability due to Early Retirement Incentive (ERI) retirees currently waiving retiree health care through the City, but assumed to return to coverage at a later date.*

The long-term rate of investment return used in this valuation was 7.25%.

## Experience Gain/(Loss)

### Gains/(Losses) During the Year Ended December 31, 2024 Resulting from Differences between Assumed and Actual Experience

A. Derivation of Actuarial Gain/(Loss):

1. Unfunded Actuarial Accrued Liability (UAAL) - Previous Valuation	\$(2,335,576)
2. Total Normal Cost (employer) for Year Ending 12/31/2024	793,672
3. Total Contributions (employer) for Year Ending 12/31/2024	3,500,000
4. Interest on:	
a. UAAL: Discount Rate* x (1)	(169,329)
b. Normal Cost and Contributions: Discount Rate/2 x [(2) - (3)]	(98,104)
c. Net Total: (a) + (b)	(267,433)
5. Change in UAAL due to Benefit Changes	921,783
6. Change in UAAL due to Assumptions	3,312,436
7. Expected UAAL Current Year:	
(1) + (2) - (3) + (4c) + (5) + (6)	(1,075,118)
8. Actual UAAL Current Year	(6,280,313)
9. Experience Gain/(Loss): (7) - (8)	5,205,195

B. Approximate Portion of Gain/(Loss) due to Investments 784,796

C. Approximate Portion of Gain/(Loss) due to Liabilities: (A.9) - (B) 4,420,399

\* Based on a discount rate of 7.25%.

### Type of Activity

#### Gain/(Loss)

**Premiums.** Gains and losses resulting from actual premiums in valuation year versus that assumed from prior valuation.

\$3,861,024

**Investment Income.** If there is greater investment income than assumed, there is a gain. If less income, a loss.

784,796

**Demographic and Other.** Gains and losses resulting from demographic experience, data adjustments, timing of financial transactions, excess contributions, etc.

559,375

**Composite Gain/(Loss) During Year.**

\$5,205,195

## Development of Valuation Assets

Year Ended December 31:	2023	2024	2025	2026	2027	2028
A. Valuation Assets Beginning of Year	\$ 109,815,367	\$115,790,495				
B. Market Value End of Year	113,790,146	123,376,473				
C. Market Value Beginning of Year	101,891,367	113,790,146				
D. Non-Investment Net Cash Flow	(3,735,182)	(3,283,559)				
E. Investment Income						
E1. Market Total: B - C - D	15,633,961	12,869,886				
E2. Assumed Rate of Investment Return	7.25%	7.25%				
E3. Amount for Immediate Recognition	7,826,214	8,275,782				
E4. Amount for Phased-In Recognition: E1 - E3	7,807,747	4,594,104				
F. Phased-In Recognition of Investment Income						
F1. Current Year: 0.2 x E4	1,561,549	918,821				
F2. First Prior Year	(4,552,757)	1,561,549	\$ 918,821			
F3. Second Prior Year	2,554,540	(4,552,757)	1,561,549	\$ 918,821		
F4. Third Prior Year	302,645	2,554,540	(4,552,757)	1,561,549	\$ 918,821	
F5. Fourth Prior Year	2,018,119	302,643	2,554,540	(4,552,756)	1,561,551	\$ 918,820
F6. Total Phased-In Recognition	1,884,096	784,796	482,153	(2,072,386)	2,480,372	918,820
G. Valuation Assets End of Year: A + D + E3 + F6	115,790,495	121,567,514				
H. Difference between Market & Valuation Assets: B - G	(2,000,349)	1,808,959	1,326,806	3,399,192	918,820	0
I. Valuation Asset Recognized Rate of Return	9.00%	7.94%				
J. Market Value Recognized Rate of Return	15.63%	11.48%				

The Valuation Assets recognizes assumed investment income (line E2) fully each year. Differences between actual and assumed investment income (line E3) are phased-in over a closed five-year period. During periods when investment performance exceeds the assumed rate, Valuation Assets will tend to be less than Market Value. During periods when investment performance is less than the assumed rate, Valuation Assets will tend to be greater than Market Value. The Valuation Assets are unbiased with respect to Market Value. At any time, it may be either greater or less than Market Value. If assumed rates are exactly realized for four consecutive years, it will become equal to Market Value.

## Comments

**Comment A:** The Actuarially Determined Contribution calculated has decreased from the prior valuation.

Factors contributing to this decrease include, but are not limited to:

- More favorable premium experience than expected;
- More favorable investment experience than expected; and
- Higher employer contribution levels (\$3,500,000 – fixed contribution amount) than the calculated \$565,456.

Factors partially offsetting this decrease include, but are not limited to:

- Assumption Changes:
  - Updating the health care cost trend assumption;
  - Rates of mortality were updated to use the Pub-2010 Amount-Weighted, General and Safety, Male and Female tables, projected with mortality improvements using the fully generational MP-2021 projection scale from a base year of 2010;
  - The administrative expense load assumption was increased from \$100,000 to \$120,000;
  - Updated retirement rates for AFSCME, KMEA, General Exempt, and CSO;
  - Updated merit and longevity rates for KMEA, General Exempt, Public Safety, and CCTA;
  - Lowered the assumed age difference between spouses from assuming males are three years older than their spouses to two years older;
  - Lowered the percentage of public safety members assumed to be married at retirement from 90% to 85%;
  - Increased turnover rates for CCTA; and
  - Reduced the percentage of active members expected to elect two-person coverage at retirement from 70% to 65% and increased the percentage of active members expected to opt out at retirement from 5% to 10%.
- Benefit Changes:
  - Monthly cost share for new retirees decreased from \$124.78 to \$109.32 for one-person coverage and from \$299.47 to \$262.38 for two-person coverage.

Updating the health care cost trend assumption increased liabilities by approximately \$3,171,000. The remaining assumption changes increased liabilities by approximately \$141,000. The benefit changes increase liabilities by approximately \$922,000.

**Comment B:** The ratio of the Funding Value to Market Value of Assets was 99% at the end of 2024. In the next four years, if experience matches expectations, the funded status will generally increase and the Actuarially Determined Contribution will generally decrease as net investment gains are recognized.

**Comment C:** One of the key assumptions used in any valuation of the cost of postemployment benefits is the rate of return on the assets that will be used to pay Plan benefits. Higher assumed investment returns will result in a lower Actuarially Determined Contribution. Lower returns will tend to increase the Actuarially Determined Contribution. We have calculated the liability and the resulting Actuarially Determined Contribution using an assumed long-term rate of investment return of 7.25%.

## Comments (Concluded)

**Comment D:** The health plan closed to new hires for most groups at various dates between 2009 and 2011 (see section titled “Summary of Benefits” for more details). The Unfunded Actuarial Accrued Liabilities (UAAL) are financed over a closed 17-year period using a level dollar amortization method. A shorter amortization period would increase the Actuarially Determined Contribution.

**Comment E:** The CCTA has a side fund (not included in the Plan’s assets) with a market value of \$1,611,856 as of the valuation date. The side fund is noted in the illustrative “Valuation Results by Fund” in Appendix B of this report, and does not impact the determination of the Actuarially Determined Contribution for the Plan in total.

**Comment F:** It is our understanding that the Plan reimburses certain members for Medicare Part B premiums and, effective January 1, 2021, for Medicare Part D premiums. For purposes of this valuation, it was assumed that the level of member income in retirement does not require the member to pay any income-adjustment premiums in addition to plan premiums for Medicare Part B or Medicare Part D.

**Comment G:** The Governmental Accounting Standards Board (GASB) issued GASB Statement No. 74 for plan OPEB disclosures effective for fiscal years beginning after June 15, 2016 and GASB Statement No. 75 for employer OPEB disclosures effective for employer fiscal years beginning after June 15, 2017. It is our understanding that the City needs to comply with GASB Statement Nos. 74 and 75 for each fiscal year ending December 31. The basis for the December 31, 2025 GASB information is expected to be this valuation (as of December 31, 2024), where roll-forward techniques will be applied. GASB information for the fiscal year ending December 31, 2024 was provided to the City in a report dated April 30, 2025.

**Comment H:** Unless otherwise indicated, a funded status measurement presented in this report is based upon the actuarial accrued liability and the actuarial value of assets. Unless otherwise indicated, with regard to any funded status measurements presented in this report:

- The measurement is inappropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the Plan’s benefit obligations;
- A funded status measurement of 100% is not synonymous with no required future contributions. If the funded status were 100%, the Plan would still require future normal cost contributions (i.e., contributions to cover the cost of the active membership accruing an additional year of service credit); and
- The measurement is inappropriate for assessing the need for or the amount of future employer contributions.

**Comment I:** The Michigan State Treasurer has established uniform actuarial assumptions as required by Public Act 202 (PA 202) of 2017 for use with the annual Form 5572 (Retirement System Annual Report). The use of the uniform assumptions for reporting purposes is required for the fiscal year ending December 31, 2024. GRS provided the necessary PA 202 uniform assumption information as part of the December 31, 2024 GASB Statement Nos. 74 and 75 report dated April 30, 2025.

## SECTION B

---

### RETIREE PREMIUM RATE DEVELOPMENT

# Retiree Premium Rate Development

## Rate Development

Eligible non-Medicare City retirees receive benefits from a number of health care plans, including the self-insured Blue Cross Blue Shield (BCBS) Traditional plans and the self-insured Community Blue PPO plans. For these self-insured medical plans, initial per capita costs were developed using incurred medical and prescription drug claims experience from October 2021 to September 2024 in conjunction with exposure data for the retired members of the health care program. These medical and prescription drug claims were projected on an incurred claim basis, adjusted for plan design changes, large claims and loaded for administrative and stop-loss expenses. The initial medical and drug premium rates use weightings of each year in the three-year experience period (10/2021 – 9/2024) to smooth out any large year-to-year fluctuations.

Most retiree plans are closed to future retirees. The plans that remain open include suffixes 0022, 0023, 0025, 0026, 0030, 0031, 0036, 0037, 0049, 0050, 0053, 0054, 0055, and 0056. Depending on active group membership, future retirees will be placed into one of these suffixes. Separate premium rates are developed for the future retirees in order to reflect the benefit differences.

For Medicare retirees, the January 1, 2025 fully-insured Medicare Advantage Prescription Drug premium rates are used as the basis of the initial per capita cost since the rate reflects the demographics of the post-65 retiree group. The coverage available to members who retired prior to 2008 has more favorable benefit levels and differs from those available to members retiring in 2008 or later. Separate premium rates are developed for the future retirees in order to reflect the benefit differences.

Age-graded and sex-distinct premiums are utilized by this valuation. The initial costs developed by the preceding process are appropriate for the unique age and sex distribution currently existing. Over the future years covered by this valuation, the age and sex distribution will most likely change. Therefore, our process “distributes” the average premium over all age/sex combinations and assigns a unique premium for each combination. The age/sex specific premiums more accurately reflect the health care costs in the retired population over the projection period.

## Retiree Premium Rate Development (Continued)

The tables below show the resulting combined medical and prescription drug one-person monthly premiums at select ages. The premium (or per capita costs) rates shown below were used in this valuation of the Plan and reflect the use of age grading.

For Those Not Eligible for Medicare (Pre-65)				
Age	Future Retirees		Current Retirees	
	Male	Female	Male	Female
40	\$ 476.53	\$ 774.33	\$ 485.54	\$ 788.97
50	772.45	951.58	787.06	969.58
60	1,312.81	1,292.66	1,337.64	1,317.12
64	1,596.41	1,506.58	1,626.61	1,535.08

For Those Eligible for Medicare (Post-65)				
Age	Future Retirees		Current Retirees	
	Male	Female	Male	Female
65	\$ 163.56	\$ 154.27	\$ 302.24	\$ 285.07
75	191.37	186.73	353.62	345.05
85	202.36	204.74	373.93	378.34

In addition, the Plan reimburses certain members for Medicare Part B premiums. The monthly Medicare Part B premium applied in this valuation (as of January 1, 2025) was \$185.00.

# Retiree Premium Rate Development (Continued)

## Health Care Trend Assumption

The health care cost trend rate is the rate of change in per capita health care claims over time as a result of factors such as medical inflation, utilization of health care services, plan design, and technological improvements. It is a crucial economic assumption that is required for measuring retiree health care benefit obligations.

Retiree health care valuations use a health care cost trend assumption (trend vector) that changes over the years. The trend vector used in this valuation begins with a near-term trend assumption and declines over time to an ultimate trend rate. The near-term rates reflect the increases in the current cost of health care goods and services. The process of trending down to a lower ultimate trend relies on the theory that premium levels will moderate over the long-term; otherwise, the health care sector would eventually consume the entire GDP. It is on this basis that projected premium rate increases continue to exceed wage inflation for the next fifteen years, but by less each year, until leveling off at an ultimate rate, assumed to be 3.50% in this valuation. See below for further details regarding the trend vector used in this valuation.

While experience is often the best starting point for future costs, GRS does not rely on a group's experience in setting the near-term trend assumptions since trends vary significantly from year to year and are not credible for most groups. Therefore, professional judgment, trends from GRS' book of business, and industry benchmarks (e.g., trend reports from various Pharmacy Benefit Management (PBM) organizations and national health care benefit consulting firms) are used in conjunction with a group's historical experience to establish the trend assumptions.

Year after Valuation	Health Care Trend Inflation Rates		
	Pre-65 Health Care	Post-65 Health Care	Medicare Part B
1	7.75%	6.50%	5.50%
2	7.50	6.25	5.50
3	7.25	6.00	5.50
4	6.75	5.75	5.50
5	6.50	5.75	5.50
6	6.25	5.50	5.50
7	6.00	5.25	5.25
8	5.75	5.00	5.00
9	5.25	4.75	4.75
10	5.00	4.50	4.50
11	4.75	4.25	4.25
12	4.50	4.25	4.25
13	4.00	4.00	4.00
14	3.75	3.75	3.75
15 +	3.50	3.50	3.50

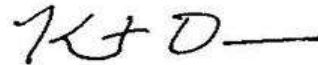

## Retiree Premium Rate Development (Concluded)

The premium rates used in this valuation were developed using proprietary Excel models which, in Kurt Dosson's professional judgment, provide initial projected costs which are consistent with the purposes of the valuation. We perform tests to ensure that the models, in their entirety, reasonably represent that which is intended to be modeled.

Aging factors used in the premium development models were developed based on information and data from a 2013 study commissioned by the Society of Actuaries entitled "Health Care Costs – From Birth to Death."

Kurt Dosson is a Member of the American Academy of Actuaries (MAAA) and meets the Qualification Standards of the American Academy of Actuaries to certify the per capita retiree health care rates shown on the prior page.

**Comment A:** Employees retiring effective 10/1/16 and later at 57 years of age and 25 years of service will pay the same as active employees to a maximum of 50% above the contribution the retiree paid during the last month of the retiree's employment. Persons retiring with less than 25 years of service will pay the same increases as active employees to a maximum of 50% above the contribution paid at the time of retirement. Employees retiring after 1/1/24 will pay the same as active employees to a maximum of 80% above the contribution the retiree paid during the last month of the retiree's employment.

**Comment B:** Retirees are not reimbursed by the City for Medicare Part A or Part B Premiums. Post-Medicare retiree cost-sharing remains the same as pre-65.

**Comment C:** There are retirees currently opting out of the retiree health care plan, they may re-enroll at open enrollment or with a qualifying insurance event, there is no stipend for waiving coverage.

**Comment D:** There are retirees whose benefit is not described above, data was provided individually by the City for the valuation.

**Comment E:** This is a brief summary of the City of Kalamazoo's Postretirement Welfare Plan Benefit provisions. In the event that any description contained herein differs from the actual eligibility or benefit, the appropriate employee contract or governing document will prevail.

**Comment F:** Effective 1/1/2021, retirees & spouses move to the Medicare Advantage Plan based on retiree enrollment in Medicare. If retiree is not yet enrolled in Medicare, the spouse remains in the commercial plan until retiree is enrolled in Medicare. Both retiree and spouse will then be moved to the Medicare Advantage plan.

**Comment G:** Beginning 1/1/2021, with the implementation of the MAPD plans, the City reimburses any income-adjustment amount, if applicable, for Medicare Part D.

For retirements 12/1/2017 - 6/30/2020, the retiree will receive the same coverage as active employees and continue to pay the increasing active contribution rate to a maximum of 75% above the contribution rate at the time of retirement. For retirements on or after 7/1/2020, the retiree will receive the same coverage as active employees and continue to pay the increasing active contribution rate to a maximum of 80% above the contribution rate at the time of retirement.

**Comment B:** Retirees are not reimbursed by the City for Medicare Part A or Part B Premiums. Post-Medicare retiree cost-sharing remains the same as pre-65.

**Comment C:** There are retirees currently opting out of the retiree health care plan, they may re-enroll at open enrollment or with a qualifying insurance event, there is no stipend for waiving coverage. For retirements on or after 1/1/2018, if the retiree waives coverage, they can't opt back in at a later date.

**Comment D:** There are retirees whose benefit is not described above, data was provided individually by the City for the valuation.

**Comment E:** This is a brief summary of the City of Kalamazoo's Postretirement Welfare Plan Benefit provisions. In the event that any description contained herein differs from the actual eligibility or benefit, the appropriate employee contract or governing document will prevail.

**Comment F:** Effective 1/1/2021, retirees & spouses move to the Medicare Advantage Plan based on retiree enrollment in Medicare. If retiree is not yet enrolled in Medicare, the spouse remains in the commercial plan until retiree is enrolled in Medicare. Both retiree and spouse will then be moved to the Medicare Advantage plan.

**Comment G:** Beginning 1/1/2021, with the implementation of the MAPD plans, the City reimburses any income-adjustment amount, if applicable, for Medicare Part D.

## **SECTION D**

---

### **SUMMARY OF THE INFORMATION SUBMITTED FOR THE VALUATION**

# Reported Financial Information for the Year Ended December 31, 2024 (Market Value)

## Revenues and Expenditures During the Year

### Revenues:

a. Retiree contributions	\$ 1,074,657	
b. Employer contributions	3,500,000	
c. Interest and dividends	3,012,584	
d. Net Appreciation in Fair Value of Investments	<u>10,184,145</u>	
e. Total		\$17,771,386

### Expenditures:

a. Benefits paid*	7,742,668	
b. Administrative expenses	115,548	
c. Investment expenses	<u>326,843</u>	
d. Total		<u>8,185,059</u>

### Reserve Increase:

Total revenues minus total expenditures	<u><u>\$9,586,327</u></u>
---	---------------------------

\* Includes amounts paid by retirees.

## Assets and Reserves

### Assets:

a. Cash or equivalents	\$ 733,177
b. Receivables net of payables	16,087
c. Stocks	86,252,898
d. Fixed income	30,737,549
e. Real Estate Investment Fund	5,636,762
f. Funding Value Adjustment	<u>0</u>
Total	<u><u>\$123,376,473</u></u>

### Reserves for Employer Contributions:

a. General Fund	\$ 123,376,473
b. Metro Fund	0
c. Water Fund	0
d. Wastewater Fund	0
Total	<u><u>\$123,376,473</u></u>

## Active Members as of January 1, 2025 by Age and Years of Service\*

Age	Years of Service to Valuation Date							Totals
	0-4	5-9	10-14	15-19	20-24	25-29	30 Plus	No.
30-34			2					2
35-39			5	5	1			11
40-44			1	23	6			30
45-49			1	3	22	8		34
50-54			1	7	12	10	10	40
55-59			2	2	7	7	6	24
60-64			1	1	6	2	4	14
65 & Over				1	2		1	4
<b>Totals</b>			<b>13</b>	<b>42</b>	<b>56</b>	<b>27</b>	<b>21</b>	<b>159</b>

\* Excludes 593 individuals who are not eligible for retiree health insurance at retirement. A Health Savings Account is available instead.

While not used in the financial computations, the following group averages are computed and shown because of their general interest.

**Age:** 49.9 years  
**Service:** 22.9 years

## Inactive Members as of January 1, 2025 by Age and Coverage Type

### Number of Retiree Health Contracts\*

	Opt-Out/ Ineligible	One-Person Coverage	Two-Person Coverage	Total
Male	175	154	333	662
Female	199	113	46	358
Total	374	267	379	1,020

\* Members receiving more than one pension were only counted once for purposes of OPEB benefits.

**Notes:**

- Opt-Out/Ineligible:** Includes 17 retirees who waived coverage and 12 DROP members. These members are assumed to begin drawing benefits in the future.
- One-Person Coverage:** Includes surviving spouses who receive City paid coverage for one year following the member's death.
- Two-Person Coverage:** Includes family coverage.

Age	Number of Those Covered
	Retiree Health
0-44	1
45-49	1
50-54	17
55-59	55
60-64	98
65-69	137

90-94	11
95 +	3
<b>Totals</b>	<b>646</b>

### Number of Terminated Vested Contracts

Terminated vested members are not eligible for Plan benefits.

## SECTION E

---

### ACTUARIAL COST METHOD AND ACTUARIAL ASSUMPTIONS

## Actuarial Methods

The actuarial assumptions used for this report were based upon the results of an Experience Study for the City of Kalamazoo Employees Retirement System covering the period January 1, 2019 through December 31, 2023. A report dated January 15, 2025 presented the results of this Experience Study.

**Actuarial Cost Method.** Normal cost and the allocation of benefit values between service rendered before and after the valuation date was determined using an **Individual Entry-Age Actuarial Cost Method** having the following characteristics:

- (i) The annual normal cost for each individual active member, payable from the date of employment to the date of retirement, is sufficient to accumulate the value of the member's benefit at the time of retirement; and
- (ii) Each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Actuarial gains (losses), as they occur, reduce (increase) the Unfunded Actuarial Accrued Liability.

**Financing of Unfunded Actuarial Accrued Liabilities.** Unfunded Actuarial Accrued Liability (UAAL) (full funding credit if assets exceed liabilities) were amortized as a level dollar over a 17-year period.

**Amortization of Unfunded Actuarial Accrued Liability.** The following amortization factor was used in developing the Actuarially Determined Contribution for the year shown:

	2025 Calendar Year
Amortization Period	17
Level Dollar	9.9402

**Asset Valuation Method.** Last year's valuation assets are increased by contributions and expected investment income on last year's valuation assets and non-investment net cash flow and reduced by refunds, benefit payments and expenses. To this amount is added the phased-in recognition of investment income. The phased-in recognition is the sum over the five years ending on the valuation date of 20% of the difference between each year's expected return and actual market return.

## Actuarial Assumptions

**Investment Return.** The rate of investment return is compounded annually net of investment expenses.

Investment Return	7.25%
Wage Inflation	3.50%
Price Inflation	2.25%
Spread Between Investment Return and Wage Inflation	3.75%
Spread Between Investment Return and Price Inflation	5.00%

**The rates of salary increase** used for individual members are in accordance with the following table.

The annual rate of pay increases consists of two parts:

- (i) A long-term rate of pay inflation equal to 3.50%; and
- (ii) Merit and longevity increases which vary according to age or length of service. These rates are illustrated below:

Years of Service	KMEA	AFSCME	General Exempt	Non-Sworn Public Safety	CCTA Union	CCTA Exempt	Public Safety
1	7.0%	8.0%	6.0%	8.0%	6.0%	8.0%	15.0%
2	6.0	3.0	6.0	7.0	5.0	6.0	12.0
3	5.0	3.0	3.0	6.0	4.0	3.0	5.5
4	2.0	2.0	3.0	4.0	4.0	2.0	4.5
5	1.0	2.0	3.0	3.0	4.0	2.0	4.5
6	1.0	1.0	3.0	1.5	2.0	1.0	4.0
7	1.0	0.0	2.0	1.5	1.0	1.0	4.0
8	1.0	0.0	1.5	1.5	0.5	0.5	4.0
9	0.0	0.0	1.0	1.5	0.5	0.5	1.5
10	0.0	0.0	1.0	1.5	0.5	0.5	1.3
11	0.0	0.0	1.0	0.5	0.5	0.5	1.0
12	0.0	0.0	1.0	0.3	0.5	0.5	1.0
13	0.0	0.0	0.5	0.3	0.5	0.5	0.5
14	0.0	0.0	0.5	0.3	0.5	0.5	0.5
thereafter	0.0	0.0	0.0	0.3	0.0	0.0	0.0

## Actuarial Assumptions (Continued)

The mortality tables (a risk assumption) used in the valuation are described below:

### Non-Public Safety

- **Healthy Pre-Retirement:** The Pub-2010 Amount-Weighted, General, Employee, Male and Female tables, projected with mortality improvements using the fully generational MP-2021 projection scale from a base year of 2010.
- **Healthy Post-Retirement:** The Pub-2010 Amount-Weighted, General, Healthy Retiree, Male and Female tables, projected with mortality improvements using the fully generational MP-2021 projection scale from a base year of 2010.
- **Disability Retirement:** The Pub-2010 Amount-Weighted, General, Disabled Retiree, Male and Female, projected with mortality improvements using the fully generational MP-2021 projection scale from a base year of 2010.

Sample Attained Ages	Healthy Pre-Retirement		Healthy Post-Retirement		Disabled Retirement	
	Future Life		Future Life		Future Life	
	Expectancy (Years)		Expectancy (Years)		Expectancy (Years)	
	Men	Women	Men	Women	Men	Women
55	34.20	36.25	30.72	33.55	22.91	25.76
60	29.29	31.22	25.99	28.68	19.73	22.42
65	24.52	26.29	21.48	23.94	16.77	19.12
70	19.86	21.45	17.21	19.40	13.94	15.73
75	15.32	16.73	13.27	15.14	11.16	12.43
80	10.90	12.17	9.79	11.31	8.57	9.47

\* Based on retirements in 2024. Retirements in future years will reflect improvements in life expectancy.

### Public Safety

- **Healthy Pre-Retirement:** The Pub-2010 Amount-Weighted, Safety, Employee, Male and Female tables, projected with mortality improvements using the fully generational MP-2021 projection scale from a base year of 2010.
- **Healthy Post-Retirement:** The Pub-2010 Amount-Weighted, Safety, Healthy Retiree, Male and Female tables, projected with mortality improvements using the fully generational MP-2021 projection scale from a base year of 2010.
- **Disability Retirement:** The Pub-2010 Amount-Weighted, Safety, Disabled Retiree, Male and Female, projected with mortality improvements using the fully generational MP-2021 projection scale from a base year of 2010.

Sample Attained Ages	Healthy Pre-Retirement		Healthy Post-Retirement		Disabled Retirement	
	Future Life		Future Life		Future Life	
	Expectancy (Years)		Expectancy (Years)		Expectancy (Years)	
	Men	Women	Men	Women	Men	Women
55	33.50	35.91	30.60	32.58	29.40	31.55
60	28.50	30.87	25.70	27.66	24.71	26.91
65	23.62	25.88	21.09	23.00	20.33	22.54
70	18.90	20.96	16.79	18.60	16.28	18.40
75	14.42	16.22	12.87	14.52	12.55	14.48
80	10.23	11.75	9.43	10.89	9.31	10.89

\* Based on retirements in 2024. Retirements in future years will reflect improvements in life expectancy.

100% of deaths are assumed to be non-duty for all members.

## Actuarial Assumptions (Continued)

**The rates of retirement** used to measure the probability of eligible members retiring during the next year were as follows:

Retirement Ages	KMEA	AFSCME	General Exempt	Non-Sworn Public Safety	CCTA Union	CCTA Exempt
55	2%	5%	7%	7%	10%	10%
56	2	5	7	7	10	10
57	5	8	20	20	25	25
58	5	5	20	20	25	25
59	10	5	15	15	20	20
60	10	20	25	25	25	25
61	10	15	15	15	30	30
62	40	50	20	20	30	30
63	10	20	10	10	15	15
64	10	20	10	10	15	15
65	100	100	100	100	100	100

Years of Service	Public Safety
20	2%
21	2
22	2
23	2
24	2
25	80
26	30
27	45
28	25
29	25
30	100

Retirement probabilities were applied for General and CCTA members after both attaining age 55 and completing 15 years of service, or age 62 with 10 years of service (5 years for General Exempt, 5 years for Transit Exempt hired before 9/1/2010, 9 years for AFSCME and 8 years for KMEA hired before 1/1/2009). AFSCME members are also considered eligible for retirement at age 60 with 20 or more years of service. Retirement probabilities were applied for Public Safety members upon completion of 20 years of service with 100% retirement probability assumed at age 60 with 10 years of service.

## Actuarial Assumptions (Continued)

**Rates of separation from active membership** were as shown below (rates do not apply to members eligible to retire and do not include separation on account of death or disability). This assumption measures the probabilities of members remaining in employment.

Sample Ages	Years of Service	% of Active Members Separating within Next Year						Public Safety
		KMEA	AFSCME	General Exempt	Non-Sworn Public Safety	CCTA Union	CCTA Exempt	
	0	16.0%	16.0%	16.0%	16.0%	18.0%	18.0%	7.5%
	1	15.0	15.0	15.0	15.0	16.0	16.0	5.0
	2	12.0	12.0	12.0	12.0	12.0	12.0	3.8
	3	10.0	10.0	10.0	10.0	11.0	11.0	3.0
	4	8.0	8.0	8.0	8.0	10.0	10.0	3.0
25	5 or Over	8.0	8.0	8.0	8.0	7.4	7.4	2.5
30		7.0	7.0	7.0	7.0	5.8	5.8	2.2
35		6.0	6.0	6.0	6.0	5.0	5.0	1.4
40		5.0	5.0	5.0	5.0	4.0	4.0	1.1
45		4.0	4.0	4.0	4.0	3.3	3.3	0.8
50		3.0	3.0	3.0	3.0	2.5	2.5	0.6
55		2.4	2.4	2.4	2.4	2.0	2.0	0.4
60		2.4	2.4	2.4	2.4	2.0	2.0	0.4

## Actuarial Assumptions (Continued)

### Disability Rates

Disability rates are used in the valuation to estimate the incidence of member disability in future years.

The assumed rates of disablement at various ages are shown below:

Sample Ages	% of Active Members Becoming Disabled within Next Year	
	Public Safety	KMEA
	CCTA Union AFSCME	All Exempt CSO
20	0.23%	0.04%
25	0.27	0.04
30	0.32	0.04
35	0.40	0.04
40	0.55	0.10
45	0.76	0.13
50	1.45	0.25
55	2.84	0.45
60	0.00	0.71

## Actuarial Assumptions (Concluded)

**Health Care Coverage at Retirement** as described in the table below, shows the assumed portion of future retirees currently waiving coverage, electing one-person or two-person/family coverage, or opting-out of coverage entirely. It was also assumed active employees currently opting-out of health care would elect health care based on the following table:

	One-Person	Two-Person/Family		Opt-Out
		Electing	Continuing*	
All Groups	25%	65%	100%	10%

\* Continuation period for surviving spouses is one year.

### Current Waivers:

**Non-ERI retirees** who are opting-out of health care were assumed to continue opting-out of health care indefinitely. If current non-ERI retirees choose to opt back in for coverage, if allowed, there would be a loss in future valuations.

**ERI retirees** currently waiving coverage are assumed to return to coverage at age 62.

**DROP members** are assumed to remain in the DROP for the lesser of two years after the valuation date and the time remaining until their DROP participation period ends.

## Miscellaneous and Technical Assumptions

<b>Administrative Expenses</b>	\$120,000 per year.
<b>Decrement Operation</b>	Death-in-service decrement does not operate until member becomes vested. Withdrawal does not operate during retirement eligibility.
<b>Decrement Timing</b>	Decrements are assumed to occur at the middle of the fiscal year.
<b>Decrement Relativity</b>	Decrement Rates are used directly from the experience study of the pension retirement system, without adjustment for multiple decrement effects.
<b>Eligibility Testing</b>	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
<b>Incidence of Contributions</b>	Contributions are assumed to be received continuously throughout the year based upon the computed dollar amount shown in this report.
<b>Marriage Assumption</b>	100% of males and 100% of females are assumed to be married at time of in-service death. Male spouses are assumed to be three years older than female spouses for active valuation purposes.
<b>Surviving Spouse Benefit</b>	Surviving spouses of active and retired members of the plan are given one year of benefit at the cost the retiree has to pay; after one year the spouse must pay 100% of premium. Liabilities have been loaded 1.00% to account for this benefit.
<b>Medicare Coverage</b>	Assumed to be available for all covered employees on attainment of age 65. Disabled retirees were assumed to be eligible for Medicare coverage at age 65.
<b>Other</b>	Plan liabilities were loaded by 10% to account for the fluctuation in medical and prescription drug claims volatility. DROP members were assumed to opt out of coverage upon exiting the DROP in the same proportion as non-DROP active members.

**APPENDIX A**

---

**GLOSSARY**

## Glossary

**Accrued Service.** The service credited under the plan which was rendered before the date of the actuarial valuation.

**Actuarial Accrued Liability.** The difference between (i) the actuarial present value of future plan benefits, and (ii) the actuarial present value of future normal cost. Sometimes referred to as “accrued liability” or “past service liability.”

**Actuarial Assumptions.** Estimates of future plan experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and salary increases. Decrement assumptions (rates of mortality, disability, turnover and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (salary increases and investment income) consist of an underlying rate in an inflation-free environment plus a provision for a long-term average rate of inflation.

**Actuarial Cost Method.** A mathematical budgeting procedure for allocating the dollar amount of the “actuarial present value of future plan benefits” between the actuarial present value of future normal cost and the actuarial accrued liability. Sometimes referred to as the “actuarial funding method.”

**Actuarial Equivalent.** A single amount or series of amounts of equal value to another single amount or series of amounts, computed on the basis of the rate(s) of interest and mortality tables used by the plan.

**Actuarial Present Value.** The amount of funds presently required to provide a payment or series of payments in the future. It is determined by discounting the future payments at a predetermined rate of interest, taking into account the probability of payment.

**Actuarially Determined Contribution.** The Actuarially Determined Contribution is the normal cost plus the portion of the unfunded actuarial accrued liability to be amortized in the current period. The Actuarially Determined Contribution is an amount that is actuarially determined in accordance with the requirements so that, if paid on an ongoing basis, it would be expected to provide sufficient resources to fund both the normal cost for each year and the amortized unfunded actuarial accrued liability.

**Amortization.** Paying off an interest-bearing liability by means of periodic payments of interest and principal, as opposed to paying it off with a lump sum payment.

**Governmental Accounting Standards Board (GASB).** GASB is the private, nonpartisan, nonprofit organization that works to create and improve the rules U.S. state and local governments follow when accounting for their finances and reporting them to the public.

**Implicit Rate Subsidy.** It is common practice for employers to allow retirees to continue in the employer’s group health insurance plan (which also covers active employees), often charging the retiree some portion of the premium charged for active employees. Under the theory that retirees have higher utilization of services, the difference between the true cost of providing retiree coverage and what the retiree is being charged is known as the implicit rate subsidy.

## Glossary (Concluded)

**Medical Trend Rate (Health Care Inflation).** The increase in the cost of providing health care benefits over time. Trend includes such elements as pure price inflation, changes in utilization, advances in medical technology, and cost shifting.

**Normal Cost.** The annual cost assigned, under the actuarial funding method, to current and subsequent plan years. Sometimes referred to as “current service cost.” Any payment toward the unfunded actuarial accrued liability is not part of the normal cost.

**Other Postemployment Benefits (OPEB).** OPEB are Postemployment Benefits Other Than Pensions. OPEB generally takes the form of health insurance, dental, vision, prescription drugs, life insurance or other health care benefits.

**Reserve Account.** An account used to indicate that funds have been set aside for a specific purpose and are not generally available for other uses.

**Unfunded Actuarial Accrued Liability.** The difference between the actuarial accrued liability and valuation assets. Sometimes referred to as “unfunded actuarial accrued liability.”

**Valuation Assets.** The value of current plan assets recognized for valuation purposes.

## APPENDIX B

---

### VALUATION RESULTS BY FUND

## Valuation Results by Fund

The purpose of this appendix is to segregate the results of the January 1, 2025 valuation of the Postretirement Welfare Benefits Plan for the City of Kalamazoo by OPEB fund.

The Actuarially Determined Contribution (ADC) is developed on a Plan-wide basis, and could be significantly different than the results as determined for each individual fund.

The following **additional data** was provided by the City for use in this study:

- Allocation percentages for Funding Sources within General-PublicWorks
  - 11%: General-PublicWorks
  - 40%: Major Streets
  - 34%: Local Streets
  - 15%: Solid Waste
- Asset Allocation Method: Use of equal funded ratio for each fund
- General-PublicWorks results are grouped under the “General” heading

# Restatement of January 1, 2025 Valuation Results by Fund

<sup>^</sup> A 17-year amortization period is utilized for the 2025 calendar year.

\* Includes additional liability due to Early Retirement Incentive (ERI) retirees currently waiving retiree health care through the City, but assumed to return to coverage at a later date.

<sup>&</sup> Includes "General-PublicWorks."

## Notes:

- The CCTA has a side fund containing additional market value assets of \$1,611,856 as of the valuation date. While neither used in the calculations above nor elsewhere in this report, reflecting the side fund in CCTA assets on a market value basis would reduce the Actuarially Determined Contribution for CCTA to \$0.
- The results displayed above were developed using the census/claims data, benefits, and actuarial methods/assumptions used in the January 1, 2025 valuation, including an interest rate of 7.25%.
- As the Plan cannot contribute back to the employer, the Actuarially Determined Contribution is limited to \$0, where applicable.
- The Actuarially Determined Contribution dollar amount, summed across all funds, may be different that the Actuarially Determined Contribution for the Plan in Total.
