

## Route 5- East Main

Metro regularly completes a Comprehensive Operational Analysis (COA) to ensure our transit system grows with the community. Our most recent COA, finished in February 2023, focused on supporting local growth, improving downtown travel with the new two-way street conversion, and strengthening access to key opportunities.

As part of this work, the East Main route has been redesigned to provide direct service to essential destinations — grocery stores, medical services, schools, and jobs in the Gull Road area. This new one-hour route eliminates the need to travel downtown for transfers, making trips faster, easier, and more convenient for riders.

The maps below showcase the extension of the East Main route.
